Manufacturing and Supplying a Full Line of Professional Grade Hand Tools

Wolverine Products

Professional Grade Hand Tools

About Us

Wolverine Products is a family owned & operated company that began production in 1994.

We are a division of Sure-loc Corporation. Sure-loc Corporation diversified its product line by adding a tool division now known as Wolverine Products. Wolverine Tools began manufacturing all-steel spades and shovels and is now known for manufacturing and supplying a broad line of contractor grade hand tools. Both Sure-loc Edging & Wolverine Products pride themselves on selling only to landscape professionals—not to “big box” stores, keeping the American economy strong.

We have grown to be recognized nationwide for our quality features. Here at Wolverine Tools we understand that our customers have different needs. That is why we offer a large product line including Aluminum & Steel Edging, Aluminum & Plastic Paver Restraints and Wolverine Hand Tools.

About Our Products

Wolverine Tools offer the professional contractor superior strength and quality that stands the test of time, eliminating replacement costs. Our standard and specialty tools are created using superior materials, such as chromoly steel, aircraft aluminum, pultruded fiberglass, and ash or hickory hardwoods. We sell our products exclusively through wholesale landscape suppliers, garden centers, and local hardware stores. This is because of our commitment to the industry, its professionals, and the fact that these are not ordinary home owner tools. Design, tooling, and production on many of Wolverine's products are done in-house to ensure strict quality standards. The end result is a line of products vastly superior to the tools offered by major chain retailers. At Wolverine Products, we make “Tools-Not Toys”.

Warranty Information

All Wolverine tools are warranted to be free of manufacturer's defects for the life of the product. This warranty covers all aspects of the tool and is applicable to all users, residential or commercial. This warranty does not cover abuse, neglect, or misuse of the products. Sure-loc will, at their discretion, repair or replace the defective product or substitute a comparable replacement. Repair or replacement is the sole remedy available to the end user or reseller. Sure-loc expressly denies any liability for damage, injury, or expense arising directly or indirectly as a result of the manufacturer, sale, delivery, resale, repair, use, or misuse of the products. In no event shall Sure-loc be liable for any special, incidental, or consequential damages, including, but not limited to, damages allegedly resulting from the proper or improper use or misuse of the product.

For additional warranty information or to file a warranty claim please call, email, or write us at:

Manufacturing Wolverine Tools

Quality Control

We at Wolverine Products are obsessed with quality. Each one of our tools must go through a strict regimen of quality check points.

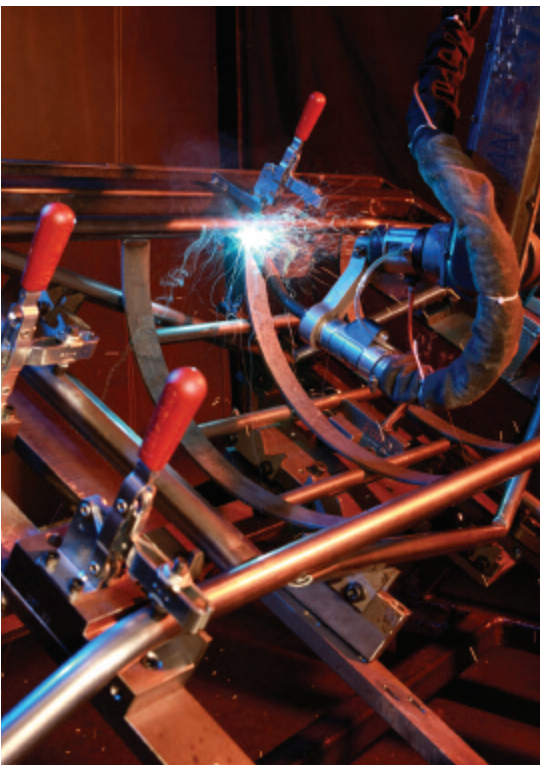

One final inspection of every product is done just prior to shipping our orders to ensure its in the best possible condition before it leaves our facility.

In-House Manufacturing

Design, tooling, and production on many of Wolverine's products are made in-house and many more are assembled on site to ensure strict quality standards and to keep our economy strong. The end result is a line of products vastly superior to the tools offered by major chain retailers.

Made in the U.S.A.

Throughout this catalog, look for this symbol to know which of our products are manufactured in-house:

Consumer Commitment

We sell our products exclusively through wholesale landscape suppliers, garden centers, and local hardware stores. This is because of our commitment to the industry, its professionals, and the fact that these are not ordinary home owner tools.

Our tools are intended to withstand use by landscape and hardscape professionals.

All-Steel Nursery Spades

Long Handle

The All-Steel Nursery Spade is Wolverine's flagship tool. Every weld and every piece of steel is from and by the very best.

Our commitment to quality is unmatched. Some say we are ridiculously obsessed with quality.

Take a closer look for yourself. It's not just another spade, its a Wolverine Spade.

Contractor Shovels

Description

Wolverine's tools are manufactured with the professional contractor in mind. We have been manufacturing and selling these shovels since 1994 and since then they have become known nationwide as tough, dependable, and long lasting tools. When you're on the job you can't be worrying about your equipment breaking or failing. That is what makes using Wolverine Products a smart choice.

Features

- Two rivets for strong head to neck attachment
- Forward turned step
- Lifetime warranty against manufacturers defects
- Northern Ash handles for maximum strength
- 14 gauge tempered steel blades for superior toughness
- Strong fiberglass handle with solid fiberglass reinforcing core
- Closed back shovels have welded back plates to prevent material build up

Cap-Rock Shovels

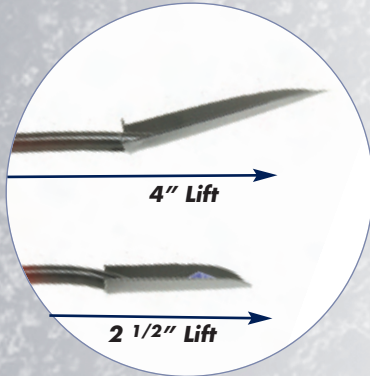

Description

Cap Rock Shovels are ideal for breaking up dense materials such as clay, coral, rock, and decomposed granite. Their low lift also makes them a perfect shovel for near vertical digging, such as with palm trees. Whatever your needs, we have a Cap Rock Shovel to meet them.

Features

- Heat treated extra thick blades which will not split like forged blades.
- Mill sharpened blades creating a razor sharp cutting surface
- Smooth comfortable powder coated steel handles
- Closed back
- Lifetime warranty against manufacturers defects
- Aircraft quality tubing on handle
- Fiberglass handle available in standard or solid core

Trenching Shovels

Description

Wolverine builds the strongest most durable Trenching Shovels on the market. Our blades are manufactured with extra thick chromoly steel. Light and durable, these shovels are perfect for trenching, digging and cleaning out landscape areas. With our various blade widths you can find the perfect trenching shovel to meet your needs.

Features

- North American Ash handles for maximum strength
- 14 gauge heat treated steel blades are the strongest on the market
- Strong fiberglass handles with solid fiberglass reinforcing core
- Convenient lift angle for digging, trenching and cleaning out trenches
- Closed back, forward turned step
- Lifetime warranty against manufacturers defects

The .115" thick blades and chromoly steel tubing offers superior strength compared to treated or carbonized mild steel.
